DIVISION OF  
OIL GAS & MINING

MEMORANDUM

**TO:** Wayne Hedberg  
Division of Oil, Gas, and Mining

**FROM:** Bill Sinclair, Director BS  
Division of Radiation Control

**SUBJECT:** Dry Valley Norm Tailings Remediation

**DATE:** June 17, 1993

Attached is a plan for the remediation of Dry Valley vanadium tailings which proposes their relocation to the Small Fry Mine in San Juan County, Utah. We would appreciate your review and concurrence that this remediation effort as presented in the attached plan does not present concerns from your program regulatory perspective. Scott Hacking of my staff has discussed this plan specifically with Holland Shepherd of your staff who has expressed interest in providing input.

We would appreciate any comments you may have regarding this specific proposal. We will need this copy back upon completion of the review process as it was supplied to us by Unocal and it has been requested of us to return this copy to them. It would be appreciated if the review could be completed and the copy returned to us by July 12, 1993. Thank you for your cooperation in this matter.
